

IN THE SPECIFICATION

On page 10, paragraph [0032], please amend as follows:

[0032] In one embodiment of a beverage composition wherein the individual components of the composition are soluble (e.g., a generally translucent beverage), the acidifier is present in an amount up to the equivalent amount of a calcium component. Examples 1 through 7 described herein present embodiments where the amount of calcium ($(0.5\text{g}/240\text{ml})(100)$) and the amount of acidifier ($((0.336 \text{ citric acid g} + 0.172 \text{ malic acid g})/240 \text{ ml})(100)$) are each 0.21 percent.
